Ultimate WhatsApp Spam

Disclaimer

I made it just for fun and as a bit of challenge to myself. I am not responsible what the user does with it. Use it on your own risk. My suggestion is DO NOT test it randomly. You wanna have fun with it? have fun with those people who are ok and allow you to do that.
Even though I would like it functional that people can use it whenever they want. However, updates are needed when WhatsApp updates. I do not promise any support or maintenance as I have many other things to take care of.
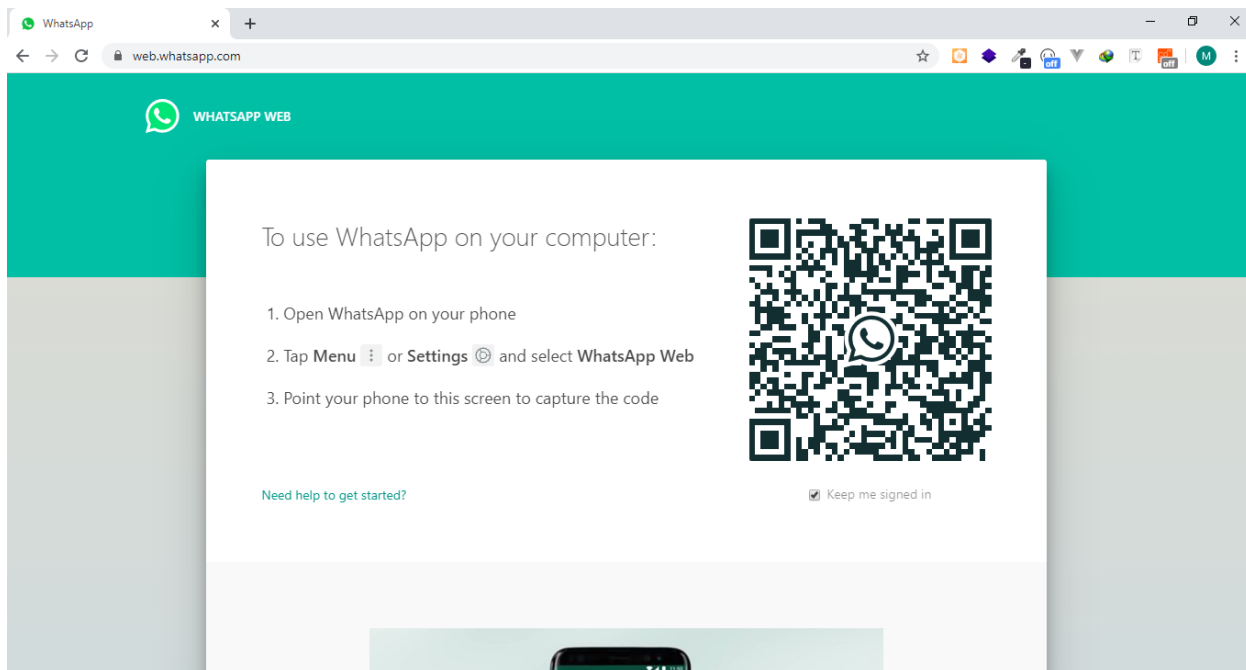

Overview

First, let's make it clear that it only works on Whatsapp Web. Open the whatsapp web, Access the developer tools on your browser. You have to paste the code in Console in and press "Enter". This will create a form on your Whatsapp, Use that form to send the message.
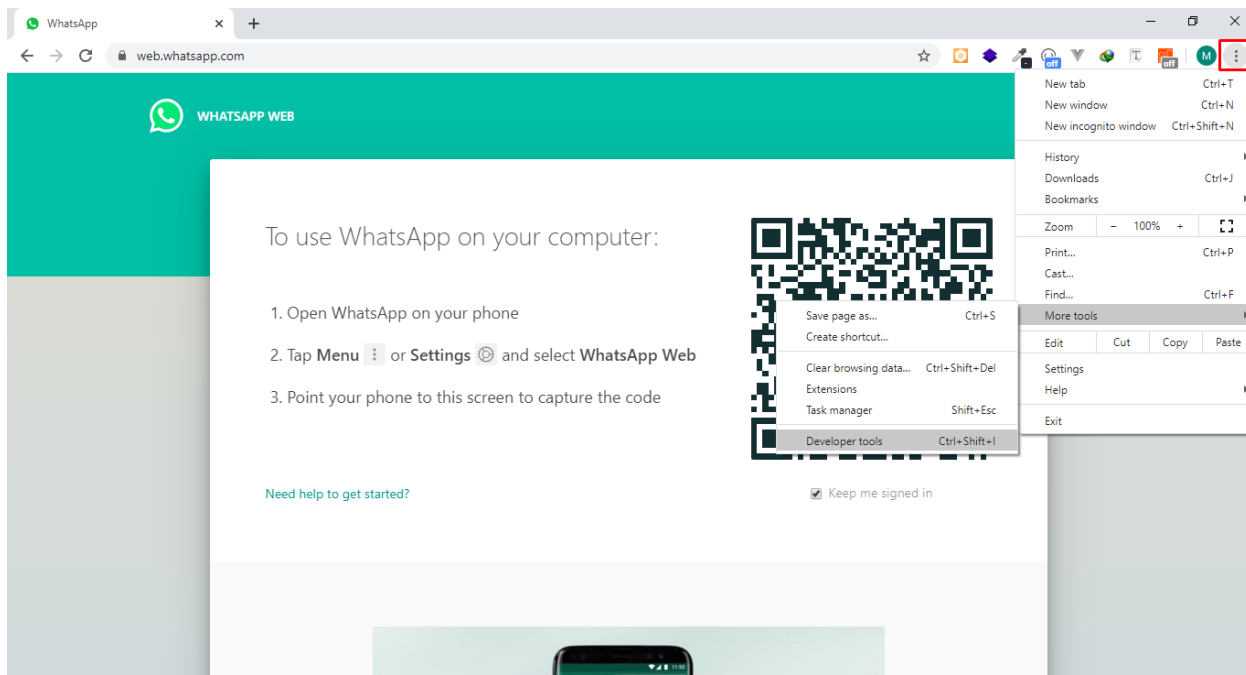

Features

- Send Multiple messages with ease
- Mention People
- Mention People even Privately

Run the Script

Open Whatsapp Web.

Open Developer tools. You can press Ctrl+Shift+I on Google Chrome to Open Developer tools.

Open the Console in Developer Tools. Paste the Code in Console and You will see a form appearing as in below ScreenShot.

How to Fill Form

1. In first field *Type Your message* , Type whatever you want to send. If you want to send *Hi* then just type that.

   Example: **Hi**

2. In second field **"YourContactName"** is Optional. If you want to Mention someone, fill this field with the name of the contact. If you provide wrong name, WhatsApp will automatically correct it based on the value of 3rd Input/Form field.

> *Example:* **John Doe**

3. In third field **"YourContactNumber"** is Optional. If you want to Mention someone, fill this field with the Phone Number of the contact. Please Use the following Format. **CountryCode+RestOfPhoneNumber**.

> *Example for India:* **91XXXXXXXXX**

Please Do not add + before Country code.
Make Sure that there are no spaces in Phone Number if You are Copy Pasting it.

4. Fourth Radio Button/Rounded Button is also Optional. Use it if You are Mentioning Someone. **"Add @mention to start"** will mention the Person at the start of message.

> *Example:* **@John Doe Hi**

5. Fifth Radio Button/Rounded Button is also Optional. Use it if You are Mentioning Someone. **"Add @mention to end"** will mention the Person at the end of message.

> *Example:* **Hi @John Doe**

6. Sixth Field **"For how many times"** requires a positive number. This will send the message for as many times as the value of this field.

> *Example:* **50**

This will send your message for 50 times.

Close the Form

If you are done OR You don't want to see the form for a while, Click on the green background **X** button to close the form.
